SPONSORSHIP
PACKAGE**

CORPORATE SPONSORSHIP

The Ontario Association of Fire Chiefs (O AFC) invites you to become an Annual Corporate Sponsor. This is your opportunity to play a key role in inspiring and influencing a safer Ontario.

WHY BE A CORPORATE SPONSOR?

Sponsoring the O AFC generates positive exposure for your company within the fire service and Ontario by elevating your company profile in a cost-effective way. It provides recognition as an invested business partner as well as a good corporate citizen. A Corporate Sponsorship also creates industry-exclusive marketing tools giving your company an important and publicly visible role in fire and life safety.

WHAT IS IN IT FOR YOU?

As a Corporate Sponsor of the Ontario Association of Fire Chiefs, your company benefits from being associated with the trusted advisors to the provincial government on fire and life safety. The higher you go up on the Sponsorship ladder, the more recognition you receive. All Corporate Sponsors will receive the following in addition to level-specific items:

- Recognition as a Corporate Sponsor on the O AFC website. The O AFC website is the 24/7 touchpoint for the Association, Ontario's Chief Fire Officers, our members, and the public.
- Advertising space in the annual membership directory (see each sponsorship level for more details).
- Logo displayed on all communications sent to members.

ACT NOW!

Choose the sponsorship level that is right for your company and get involved as a Ontario Association of Fire Chiefs Corporate Sponsor today. For more information or to become a sponsor, please contact Katelyn Widdop at katelyn.widdop@oafc.on.ca or 905-426-9865 ext. 1224.

O AFC 2024 GOVERNMENT RELATIONS PRIORITIES

1

CANCER PREVENTION & EARLY DETECTION

- The O AFC supports firefighter certification and minimum training standards as it will improve fire and life safety for Ontario's firefighters. A study by the Occupational Cancer Research Centre found that Ontario firefighters have an increased risk of developing certain cancers, including testicular cancer, melanoma and prostate cancer, when compared with other workers in Ontario.
- The International Agency for Research on Cancer has reclassified firefighting as a Group 1 human carcinogen (cancer-causing).

2

ONE WAY OUT

- Ontario is exploring the permitting of small multi-unit residential buildings with a single exit stair in sprinklered buildings. A second means of egress has been part of Ontario's leading Building and Fire Code provisions for many years and is a core principle of life safety.
- It is also a core principle of firefighting tactics and embedded in the training of all firefighters.

3

MTO BILLING FOR NO SERVICE CALLS

- Ontario's Fire Departments bill the MTO for responses to Provincial highways/roadways.
- A fire department incurs costs as soon as it is dispatched to an incident (even if the incident is unfounded)
- The fire department is unable to bill as the incident is considered "a no service call".
